

FINGER-JOINT LONG LENGTH LUMBER

ACCEPTED FOR USE UNDER ALL BUILDING CODES

Structural-glued dimension lumber is accepted for use under all model building codes and is interchangeable with solid-sawn dimension lumber of the same size, grade and species, and is grade-marked accordingly.

CERTIFIED FOR VERTICAL AND HORIZONTAL APPLICATIONS

Certified by the WWP Western Wood Products Associated, which means joints are certified for both vertical and horizontal applications.

HEAT RESISTANT ADHESIVE

Waterproof, exterior-type adhesive that meets requirements of ASTM Product Standard D2559 and WWP's glued products procedures for mill certification and quality control, C/QC 101.

EXCEPTIONAL QUALITY CONTROL STANDARDS

Product goes through regular testing throughout manufacturing including: tension break test, regular delamination boil tests, regular moisture shrink/swell tests & multiple joint strength tests

2x6, 2x8, 2x10, 2x12 | lengths up to 36'
